89.36%	227.48%

INVESTMENT STRATEGY

The NEPTUNE strategy is designed to benefit from the extreme momentum in both up- and down moves observed in crypto markets (BTC only), while also capturing the substantial profit opportunities emerging from substantial volatility in periods of range-bound price dynamics. The combination of a divergent (momentum) and convergent (mean reversion/range bound) strategies lowers draw-downs and increases Sharpe Ratios relative to a purely momentum based strategy and in particular relative to a Buy-and-Hold strategy - a strategy which is still employed by a large number of players in the crypto market.

DISCLAIMER

Sheer Markets (Cyprus) Limited ("Company") is authorized and regulated by the Cyprus Securities and Exchange Commission ("CySEC") with CIF license number 395/20. This document is for information purposes only and does not constitute an offer or an invitation to subscribe to the portfolios. Although the information in this document is believed to be materially correct, no representation or warranty is given as to the accuracy of any of the information provided. Investment in the portfolios involves significant risks, and any investments should be considered only by investors who can understand, bear the risks and can afford losing their investment.

Past performance is not an indication to future results.This example does not include the fees payable for the strategy (Gross of fees).

Performance shown is backtested for the period Jan 2018-February 2021.

Hypothetical Disclaimer: Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading strategy. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or to adhere to a particular trading strategy in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading strategy which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results.
