**INVESTMENT STRATEGY**

The Orion strategy is made of a portfolio of several proprietary algorithmic trading systems that operate in the currency market trading the most liquid currency pairs. There are three main core strategies: a "trend-following" logic, a "trend-following after pullbacks" approach and a "counter-trend" discipline. These three core strategies are applied on several intraday timeframes and pairs, in order to reduce correlated exposures in the market and improve the portfolio diversification.

This approach is followed in order to create a return profile which is more stable over time and improve the overall adaptivity against potential changes in market conditions.
